

Create a table in sql:

```
SQL> CREATE TABLE product_29114 (  
2     prod_id    NUMBER PRIMARY KEY,  
3     prod_name  VARCHAR2(50),  
4     price      NUMBER(10),  
5     stock      NUMBER(5)  
6 );  
  
Table created.
```

Insert a value into table:

```
SQL> INSERT INTO cust_11429 VALUES  
2  (106, 'satish chawda', 'Ghatkopar East, Mumbai 400069', 9876152352, 'sbhanushali@email.com');  
  
1 row created.
```

Update the stock which are available :

```
SQL> UPDATE product_11429  
2  SET stock = stock - 1  
3  WHERE prod_id = 1;  
  
1 row updated.
```

Alter a table in which name length should be extended:

```
SQL> ALTER TABLE cust_11429  
2  MODIFY c_name VARCHAR2(40);  
  
Table altered.
```

Joint + Distinct : customer who have placed order:

```
SQL> SELECT DISTINCT C.C_NAME  
2  FROM cust_11429 C  
3  JOIN orders_11429 o  
4  ON C.CUST_NO = o.CUST_NO;  
  
C_NAME  
-----  
Rajesh Patel  
Amit Desai  
Sneha Gupta  
Vikram Singh  
Priya Sharma
```

Subquery +Not in: Customer who have never placed order:

```
SQL> SELECT * FROM cust_11429 WHERE CUST_NO NOT IN (SELECT CUST_NO FROM orders_11429);  
  
no rows selected
```

Aggregate function: Average prices of product:

```
SQL> SELECT AVG(price) AS avg_price
2 FROM product_11429;

AVG_PRICE
-----
50099
```

String Function: Display product names in uppercase:

```
SQL> SELECT UPPER (PROD_NAME) AS PRODUCT_NAME FROM product_11429;

PRODUCT_NAME
-----
DELL INSPIRON 15 LAPTOP
SAMSUNG GALAXY S24
APPLE IPHONE 15 PRO
LOGITECH WIRELESS MOUSE
HP LASERJET PRINTER
```

Inner join: Orders with customer names:

```
SQL> SELECT o.ORDER_ID , C.C_NAME , o.STATUS
2 FROM orders_11429 o
3 JOIN cust_11429 C
4 ON o.CUST_NO = C.CUST_NO;
```

ORDER_ID	C_NAME	STATUS
1	Rajesh Patel	Completed
2	Priya Sharma	Shipped
3	Amit Desai	Pending
4	Sneha Gupta	Completed
5	Vikram Singh	Shipped

Group by + Sum : Total quantity ordered by each customer:

```
SQL> SELECT cust_no,
2 SUM(qty) AS total_qty
3 FROM orders_11429
4 GROUP BY CUST_NO;
```

CUST_NO	TOTAL_QTY
102	1
101	1
104	2
105	1
103	1

Case statement : Label orders based on quantity:

```
SQL> SELECT ORDER_ID,
2 CASE
3 WHEN qty = 1 THEN 'Single Order'
4 ELSE 'Bulk Order'
5 END AS order_type
6 FROM orders_11429;
```

ORDER_ID	ORDER_TYPE
1	Single Order
2	Single Order
3	Single Order
4	Bulk Order
5	Single Order

Subquery : Product that were ordered:

```
SQL> SELECT*FROM product_11429 WHERE PROD_ID IN (SELECT PROD_ID FROM orders_11429);
```

PROD_ID	PROD_NAME	PRICE	STOCK
1	Dell Inspiron 15 Laptop	45999	25
2	Samsung Galaxy S24	79999	18
3	Apple iPhone 15 Pro	109999	12
4	Logitech Wireless Mouse	1499	85
5	HP LaserJet Printer	12999	15

```
SQL> SELECT*FROM cust_11429;
```

CUST_NO	C_NAME	C_ADDR	C_PHONE	C_MAIL
101	Rajesh Patel	Andheri East, Mumbai 400069	9876543210	rajesh.patel@email.com
102	Priya Sharma	Bandra West, Mumbai 400050	9876543211	priya.sharma@email.com
103	Amit Desai	Thane West, Mumbai 400601	9876543212	amit.desai@email.com
104	Sneha Gupta	Navi Mumbai, Vashi 400703	9876543213	sneha.gupta@email.com
105	Vikram Singh	Dadar East, Mumbai 400014	9876543214	vikram.singh@email.com

```
SQL> select * from orders_11429;
```

ORDER_ID	CUST_NO	PROD_ID	QTY	ORDER_DAT	STATUS
1	101	1	1	10-JAN-26	Completed
2	102	2	1	11-JAN-26	Shipped
3	103	3	1	12-JAN-26	Pending
4	104	4	2	12-JAN-26	Completed
5	105	5	1	13-JAN-26	Shipped

```
SQL> SELECT *FROM product_11429;
```

PROD_ID	PROD_NAME	PRICE	STOCK
1	Dell Inspiron 15 Laptop	45999	25
2	Samsung Galaxy S24	79999	18
3	Apple iPhone 15 Pro	109999	12
4	Logitech Wireless Mouse	1499	85
5	HP LaserJet Printer	12999	15
